

These 117 startups have been selected for their hyper-growth, within the Digital, Industry and HealthTech sectors, all over the country, by the Pass French Tech Program.

This program is led by the French government and public partners, and implemented in the French Tech Metropolitan Areas by 14 local business operators.

These stakeholders foster business development and competitiveness, and solve the issues related to the startups' hyper-growth.

FRANCE'S HYPER-GROWTH STARTUPS

Selected within the Pass French Tech Program

#2015 #2016 #2017

For some years now, the French Tech ecosystem has seen a spectacular growth, driven by a new generation of entrepreneurs, investors, engineers and other talented people. The number of startups is exploding, fundraisings are exponential, and the number of international market leaders is growing.

This vibrant ecosystem is called “La French Tech”, a movement for entrepreneurs and by entrepreneurs, backed by the French Tech Initiative, an innovative public policy by the French Government in 2013. The French Tech Initiative is boosting this collective dynamic, and its actions have taken part in establishing this ecosystem within French economic landscape. Startups are now considered serious players, that create economic value and inspire innovation.

NEXENTURE

2009
MAXIME VIGNON
FOUNDER

nexenture

Nexenture is a start-up specializing in collaborative work for companies. Its raison d'être is to value the commitment of all employees to the service of the company, through simple, useful and used digital solutions. Valuing engagement is to highlight and distinguish the employees engaged. It is also transforming this commitment into value for the company.

Through its prestigious references (Sisley, Babolat, Panzani, Condat, Groupe Rocher, Eram Group, Crédit Agricole ...). In a few years, Nexenture has become a strategic partner of the ETIs in their digital transformation.
